First year Bachelor of Technology

Preamble

Engineering education forms the cornerstone of technological innovation, industrial advancement, and societal transformation. As the world navigates an era of rapid change driven by automation, artificial intelligence, sustainable technologies, and global connectivity, VESIT positions itself as a catalyst for cultivating a dynamic learning ecosystem.

At VESIT, we strive to foster critical thinking, technical expertise, academic excellence, and holistic development among aspiring engineers. We are committed to shaping professionals who are adaptable, collaborative and are also deeply conscious of their social and environmental responsibilities.

Leveraging its autonomous status and affiliation with the University of Mumbai, VESIT designs a forward- thinking, outcome-based curriculum that emphasizes industry relevance and experiential learning.

The syllabus at VESIT has been structured in alignment with the principles of the National Education Policy (NEP) 2020, focusing on flexibility and multidisciplinary learning. The key thrust areas of education at VESIT include:-

Student-Centric Approach:

The programme is designed to offer students greater autonomy in shaping their academic journey. The syllabus comprises Core **(Major) and Minor courses** from Diverse Disciplines as well as a wide range of **Open Electives**. Students can tailor their learning paths based on their interests and career aspirations. The curriculum also integrates mentored field projects and on the job training, providing valuable hands- on experience. Additionally, students with a research inclination can also explore **research-based projects** or pursue **Honours by Research**.

VIVEKANAND EDUCATION SOCIETY'S Institute of Technology

(An Autonomous Institute Affiliated to University of Mumbai, Approved by A.I.C.T.E & Recognized by Govt. of Maharashtra)

First year Bachelor of Technology

Multidisciplinary Approach:

VESIT's curriculum reflects a strong interdisciplinary focus, incorporating emerging fields and cutting-edge technologies. Courses are designed to bridge various domains with offerings such as **Machine learning, Artificial Intelligence & Data Science, Cyber Security, Geographic Information Systems (GIS), Internet of Things (IoT), Register transfer level VLSI, Robotics, Quantum Technologies, Mobile application development, Industrial Automation, Edge Computing and Embedded Intelligence and Information Security.**

This approach encourages broader thinking and prepares students for diverse career paths.

Emphasis on Conceptual Clarity:

The curriculum lays stress also on a strong theoretical foundation, ensuring that students gain deep conceptual understanding, which is essential for mastering advanced topics and solving real-world problems.

Fostering Creativity and Critical Thinking:

Courses are designed to nurture a critical and creative mindset, promoting analytical reasoning, problem-solving, and innovation. Students are encouraged to question, explore, and think beyond conventional solutions.

Comprehensive Evaluation and Assessment:

Student performance is assessed through a number of assessment tools that includes the Mid-term Tests, Continuous Assessments, End-Semester Examinations. These evaluation tools are designed to measure the knowledge retention of students as well as their ability to apply concepts effectively in practical situations.

Guided by a vision of excellence and inclusivity, and supported by a passionate faculty, VESIT aspires to be a hub where ideas flourish, startups emerge, and industry-academia partnerships thrive. Our goal is to transform students into innovators, entrepreneurs, researchers and responsible leaders poised to drive sustainable growth and meaningful change in society.

First year Bachelor of Technology

Enhancement Course bucket under the new name “ Engineering Visualization Lab”(2 DH+2 AutoCAD).

- Nomenclature has been changed for the following subjects :-

Sem 1	All Branches	Fundamentals of Engineering Mathematics-1 (FEM-1)	Mathematics-1 (M-1)
Sem 2	All Branches	Fundamentals of Engineering Mathematics-2 (FEM-2)	Mathematics-2 (M-2)
Sem 1 & 2	All Branches	Fundamentals of Programming(Java)	Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming
Sem 1 & 2	All Branches	Engineering Drawing	Engineering Visualization Lab
Sem 1 & 2	All Branches	Engineering Physics & Engineering Chemistry	Engineering Sciences

2025-26

R24 (A.Y. 2025-26)	Credit	Credit	Examination Marks	Examination Marks
	Group A	Group B	Group A	Group B
	CMPN, INFT	EXTC,ETCS AU & RO,AI & DS	CMPN ,INFT	EXTC,ETCS, AU & RO,AI & DS
Sem 1	20	22	565	665
Sem 2	22	20	745	645
Change/ Update in R24 syllabus (A.Y. 2025-26 Batch)	- No change - Same syllabus and scheme of R24 is continued for A.Y. 2025-26 Batch			

2024-25

R24 (A.Y. 2024-25)	Credit	Credit	Examination Marks	Examination Marks

(An Autonomous Institute Affiliated to University of Mumbai, Approved by A.I.C.T.E & Recognized by Govt. of Maharashtra)

First year Bachelor of Technology

A.Y. 2024-25 Batch)	Nomenclature has been changed for the following subjects :-	
	Sem 1	Fundamentals of Engineering Mathematics-1 (FEM-1)
	Sem 2	Fundamentals of Engineering Mathematics-2 (FEM-2)
	Sem 1 & 2	Fundamentals of Programming(C /Java)
	- Programme Core course(PCC) scheme has been changed from (1Th+2 hr Pr) to (02+02*) with the same credit of 2 and Instructions should be conducted for the entire class.Due to this change, 25 marks of Teamwork of PCC from the total weightage of Group B (Sem 1) and Group A(Sem 2) will be deducted. - Python Programming Lab is shifted from first year to second year, due to this change 25 marks of Termwork of subject from the total weightage of Group B (Sem 1) and Group A(Sem 2) will be deducted.

*Tutorial is conducted batch-wise.

Course Objectives:

To develop a strong foundation in linear algebra, complex variables, multivariable and vector calculus, and differential equations, enabling students to analyze mathematical models, solve theoretical and applied problems, and apply advanced mathematical techniques in science, engineering, and related disciplines.

Course Outcomes:

After successful completion of the course, students will be able to:

CO 1 Apply matrix algebra concepts to solve systems of equations and basic machine learning problems.

CO 2 Apply linear algebra concepts to solve systems of equations and basic machine learning problems.

CO 3 Analyze multivariable functions using partial derivatives, Jacobians, and optimization of functions of more than one variable.

CO 4 Understand the algebra and geometry of complex numbers, represent them in Cartesian, polar, and exponential forms, apply elementary complex functions such as exponential, logarithmic, trigonometric, and hyperbolic functions.

CO 5 Analyze and solve first-order differential equations, including linear, nonlinear, and exact equations, encountered in engineering applications.

First year Bachelor of Technology

CO 6 Apply numerical methods to obtain approximate solutions of algebraic and system of equations.

Module	Content	CO	No. Hrs.
Prerequisite:	Algebraic manipulation, Coordinate geometry, Basic vector algebra, Exponential and logarithmic functions, Trigonometric identities, Infinite series, Complex numbers, Set theory, Differential calculus, Integral calculus, Matrices.		
1	Matrices	CO1	05
	1.1 Rank of a matrix, echelon forms, Inverse using Gauss-Jordan method. 1.2 System of linear equations.		
2	Linear Algebra	CO2	07
	2.1 Introduction to vector spaces, subspaces over a real field 2.2 Linear independence and dependence of vectors 2.3 Basis and Orthonormal Basis, Orthogonality (Gram-Schmidt Process)		
3	Multivariable Calculus I	CO 3	06
	3.1 Partial derivatives, total derivatives, chain rule, Jacobians and applications. 3.2 Maxima and minima of functions of two variables, Method of Lagrange Multipliers.		
4	Complex Variables-I	CO1	07
	4.1 Polar Form of Complex Numbers and examples, De Moivre's theorem and application, Roots of complex numbers. 4.2 Circular and Hyperbolic functions, Logarithm of Complex Numbers, Separation into real and imaginary Parts of all types of functions.		
5	Differential Equations	CO4	07
	5.1 First order Exact and reducible to exact differential equations. Linear and reducible to Linear DE, Bernoulli's equation, 5.2 Applications in engineering systems using Initial and boundary value problems.		
6	Numerical Methods	CO5	07
	6.1 Algebraic equations (Bi-section, Newton-Raphson method) 6.2 System of Equations (Jacobi and Gauss-Seidel methods with convergence concept (basic idea).		
	Total No. of Hours		39

Internal Assessment: One Mid Term Test of 20 marks and Continuous Assessment of 20 marks.

Mid Term Test:

- The Mid Term Test is to be conducted when approximately 50% syllabus is completed.
- The duration of the Mid Term Test will be one hour.

Continuous Assessment: The assessment rubrics will be finalized with the approval of the subject teacher. Three

for	Sr.No	Rubrics	Marks	rubrics will be selected from the list below, and the best two scores will be considered the final assessment.
	1	Multiple Choice Questions/ Quiz	5 Marks	
	2	Problem-solving assignments	10 Marks	
	3	Case Study / Presentation	10 Marks	
	4	Statistical Data Analysis	10 Marks	
	5	Tutorials/ Class tests	10 Marks	
	6	MOOC / NPTEL Certification	10 Marks

First year Bachelor of Technology

7	Peer Review and Participation	5/10 Marks
8	GATE Based Assignments / Tutorials	10 Marks
9	Group problem-solving activities	10 Marks

End Semester Theory Examination:

- The question paper will be of 60 marks.
- There will be a total of five questions.
- All questions have equal weightage and carry 20 marks each.
- Any three questions out of five need to be solved.
- The duration of the **ESE** will be **two hours**.

Course Objectives:

To enhance fundamental knowledge in Engineering Sciences for its applications relevant to various streams of Engineering and Technology for solving problems in the engineering field and venturing into the research field.

Course Outcomes:

CO 1 Learners will be able to understand the foundation of quantum mechanics and how to solve problems in different areas of modern technology

CO 2 Learners will be able to understand the basics and different applications of semiconductors along with its sensing properties.

CO 3 Learners will be able to understand the foundation of fiber optics and their applications in the areas of communication, medical science and instrumentation.

CO 4 Learners will be able to apply water chemistry and treatment methods & green computing. Determining fuel quality learners will be able to evaluate its energy content and environmental impact to ensure sustainability and efficient performance.

CO 5 Learners will be able to explain the concept of electrode potential and Nernst theory, relate it to electrochemical cells and identify different types of corrosion and suggest control measures in industry.

CO 6 Learners will be able to understand fundamentals of the human nervous system and its comparison with artificial neural networks. They will also understand new concepts of bioinformatics. Learners will be able to understand different syntheses methods, and characterize nanomaterials and nano-biomaterials, relating their unique quantum-driven properties to applications in electronics, energy, engineering and medicine.

First year Bachelor of Technology

Module	Content	CO	No. Hrs.
1	Quantum Mechanics: Inadequacy of classical theory; de Broglie hypothesis of matter waves and its experimental verification; Wave packet, group velocity and phase velocity; Heisenberg Uncertainty principle, Thought experiments and applications of HUP, Wave function and its physical interpretation; Probabilistic approach: Superposition principle Schrodinger's time dependent and time independent wave equation; Free particle, Infinite potential well, introduction to Quantum Computing Concepts, Qubits	CO 1	10
2	Semiconductors: Energy band formation, FD distribution function; Fermi energy level in conductors and semiconductor; Intrinsic semiconductors: Expression for Fermi level; Effective mass; Intrinsic carrier concentration, mobility & conductivity, Extrinsic semiconductors: Fermi energy level, Expression & position; Effect of impurity concentration & temperature on the Fermi level and carrier concentration; Law of mass action, minority charge carrier concentration. Magnetic sensor, Principle of Hall effect, Application. Optical sensors: Photodiode and solar cell. IoT sensors, MEMS sensors, wearable sensors, smartphone sensors	CO 2	10
3	Fibre Optics: Working principle, structure & material, advantage; Fiber optic communication system (In Data Centers and Internet Backbone); Critical angle; Acceptance angle; Numerical aperture; fractional change in RI	CO 3	03
4	Water Introduction-Impurities in water, hardness of water-units, types and numerical problems, determination of hardness of water by EDTA method and numericals, Softening of water by an Ion Exchange process and numericals, BOD, COD-definition, significance and numericals, Water purification-membrane technology-Electrodialysis, Reverse Osmosis and Ultrafiltration, Green computing, water cooling systems in servers and HPC systems Fuel Definition, classification, characteristics of a good fuel, units of heat, Calorific value-Definition, Gross or Higher calorific value and Net or lower calorific value, Dulong's formula and numericals for calculations of Gross and Net Calorific Values Liquid fuels-Petrol-knocking, Octane Number, Cetane number, Anti Knocking agents, unleaded petrol, oxygenates (MTBE), catalytic converter Combustion-calculation for requirement of oxygen and air (by weight and by volume only for given solid and gaseous fuels)	CO 4	12
5	Corrosion Concepts of Electrochemistry, Different types of electrochemical cell, Nernst Equation and related numericals Battery technology, Lithium ion battery, fuel cell for portable electronics Definition, Mechanism of Corrosion-(i) Dry / Chemical Corrosion- (a) Due to Oxygen (b) Due to other gases, (ii) Wet/ Electrochemical Corrosion- Mechanism (a) Evolution of hydrogen (b) Absorption of oxygen gas Types of Corrosion- Galvanic Cell Corrosion, Concentration Cell Corrosion, Pitting Corrosion, Intergranular Corrosion, Stress Corrosion. Cathodic	CO 5	06

First year Bachelor of Technology

	protection-(Sacrificial anodic protection, (ii) Impressed current method, (Metallic coatings-only cathodic coating (tinning) and anodic Coating (Galvanizing) Corrosion in electronic circuits PCB degradation		
6	Fundamentals of Human nervous system Nerve cell, neuronal communication, Central Nervous system, Peripheral nervous system, Brain and its lobes. Artificial Neural Network: Comparison of human neuron with artificial neuron, Evolution of Artificial Neural Networks, Neural Networks and Representation: Weights, Bias, Activation function and Learning in ANN, Applications of ANN: Environmental monitoring, healthcare analytics & diagnostics and medical imaging Bioinformatics :- Definition, scope, and importance of bioinformatics Role of bioinformatics in modern biology, medicine, agriculture, and sustainability Advance materials and Nano technology Polymers:-Types, Properties Synthetic methods of formation of Kevlar: Urea formaldehyde, PMMA, Phenol formaldehyde Conducting polymers, Definition, Types, Applications Nano materials:-Definition, Properties Synthetic methods Top down, Bottom up Applications:-Electronics, Medicine, Energy devices	CO 6	11

First year Bachelor of Technology

Proposed Assessment and evaluation scheme

Internal Assessment:

1. **Continuous assessments** will be conducted throughout the semester using different evaluation techniques.
2. **Mid Term test** is to be conducted when approx. 50% syllabus is completed. Duration of the midterm test shall be one hour

Continuous Assessment

Continuous Assessment is of 20 marks. The rubrics for assessment will be considered on approval by the subject teachers.

Sr.No	Rubrics	Marks
1	Multiple Choice Questions (Quiz)	5 Marks
2	Tutorial Assignments	10 Marks
3	Case Study / Presentation	10 Marks
4	Statistical Data Analysis	10 Marks
5	Mini Project / AI Mathematical Modeling	10 Marks
6	MOOC / NPTEL Certification	10 Marks
7	Peer Review and Participation	5/10 Marks
8	GATE Based Assignments / Tutorials	10 Marks

End Semester Theory Examination:

1. The question paper will be of 60 marks.
2. The question paper will have a total of five questions.
3. All questions have equal weightage and carry 20 marks each.
4. Any three questions out of five need to be solved.

First year Bachelor of Technology

Subject :Engineering Sciences Laboratory

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total

		Internal Assessment		ESE				
		MT	CA					
26CSBS12	Engineering Science	-	-	-	-	25	-	25

Course Objectives

- 1 To get practical knowledge of the theory learnt and develop experimental skills.
- 2 To comprehend the importance of precision, accuracy, errors and analyze experimental results.

Course Outcomes:

- CO 1** Learners will be able to understand the foundation of quantum mechanics and how to solve problems in different areas of modern technology
- CO 2** Learners will be able to understand the basics and different applications of semiconductors along with its sensing properties.
- CO 3** Learners will be able to understand the foundation of fiber optics and their applications in the areas of communication, medical science and instrumentation.
- CO 4** Learners will study water treatment and green computing principles, and also evaluate fuel quality, energy content, environmental impact of fuel and sustainability.
- CO 5** Learners will explain electrode potential and Nernst theory, apply them to electrochemical cells, and identify and control industrial corrosion.
- CO 6** Learners will understand the fundamentals of the human nervous system, artificial neural networks, bioinformatics, and the synthesis, characterization, properties, and applications of nanomaterials and polymers.

First year Bachelor of Technology

Experiments: Minimum of 6 experiments to be conducted		COs
1	Determination of 'h' using Photo cell.	CO1
2	Determination of energy band gap of a given semiconductor	CO2
3	Determination of Hall coefficient and charge carrier density of a given semiconductor	CO2
4	Determination of Numerical Aperture of a given optical fibre.	CO3
5	Study of variation of reverse current with changing light intensity of given photo diode.	CO2
6	Determination of Chloride content of water by Mohr's Method.	CO4
7	Determination of total, temporary and permanent hardness of water sample by EDTA.	CO4
8	Determination of metal ion concentration using a colorimeter.	CO5
9	Synthesis of PF polymers.	CO6
10	Determination of the moisture content of the coal.	CO5
11	Construction and determination of EMF of an electrochemical cell.	CO6

Term Work:

1. Term work should consist of a minimum of 6 experiments.
2. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

First year Bachelor of Technology

		Internal Assessment		ESE				
		MT	CA					
26CSES11	Basic Electrical Engineering	20	20	60	2	-	-	100

Course Objectives:

- 1 To provide knowledge on fundamentals of DC circuits and single phase AC circuits and its applications.
- 2 To inculcate knowledge on the basic operation and performance of 1- Φ transformers.
- 3 To provide knowledge on fundamentals of DC and AC machines and batteries.

Course Outcomes:

- CO 1** Apply various network theorems to determine the circuit response / behaviour.
- CO 2** Evaluate and analyse 1- Φ circuits.
- CO 3** Understand the constructional features and operation of 1- Φ transformer
- CO 4** Illustrate the working principle of a DC machine.
- CO 5** Illustrate the working principles and applications of AC machines and stepper motors.
- CO 6** Explain the types, construction, working and applications of batteries, including lead-acid batteries

First year Bachelor of Technology

Module		Contents	CO's	Hrs.
Prerequisite		Resistance, inductance, capacitance, series and parallel connections of resistance, concepts of voltage, current, power and energy and its units. Working of wattmeter, Magnetic circuits, MMF, Magnetic field strength, reluctance, series and parallel magnetic circuits, BH Curve, Time domain analysis of first order RL and RC circuits		
1		DC Circuits	CO 1	08
	1.1	Ideal and Practical Sources: Independent voltage and current sources; source transformation; Kirchhoff's Current Law (KCL) and Kirchhoff's Voltage Law (KVL); Star-Delta and Delta-Star transformations.		
	1.2	Network Theorems:: Superposition, Thevenin's Theorem, Norton's Theorem and Maximum Power Transfer Theorem.		
2		AC Circuits	CO 2	08
	2.1	Alternating Quantities: Generation of alternating voltage; sinusoidal waveform; average value; RMS value; form factor; crest factor; AC circuits containing pure resistance, inductance and capacitance.		
	2.2	Single-Phase AC Circuits: R-L, R-C and R-L-C series and parallel circuits; impedance and admittance; real (active), reactive and apparent power; power factor; series and parallel resonance; resonant frequency; Q-factor and bandwidth.		
3		Transformers	CO 3	09
	3.1	Single-Phase Transformer: Working principle of single-phase transformer, EMF equation of a transformer, Transformer losses Construction and working principle; electromagnetic induction; EMF equation of a transformer; transformer losses — core losses and copper losses.		
	3.2	Performance of Transformer: Ideal and practical transformer; phasor diagrams for resistive, inductive and capacitive loads considering winding resistance and magnetic leakage; equivalent circuit; voltage regulation.		
	3.3	Testing and Efficiency: Open-circuit (no-load) test; short-circuit test; determination of equivalent circuit parameters; transformer efficiency and condition for maximum efficiency.		
4		DC Machines	CO 4	05
	4.1	Principle of operation of DC motors and DC generators, constructional details, and classification of DC machines, emf equation of motor/ generator, applications. Principle of operation of DC generator and DC motor; constructional details and classification of DC machines; EMF equation of DC generator; back EMF and torque equation of DC motor; applications of DC motors and generators.		
5		AC Machines	CO 5	05
	5.1	Single phase induction motor: Construction and working principle; double revolving field theory; starting of single-phase induction motors; split-phase induction motor and other types of single-phase induction motors; applications.		
	5.2	Stepper Motor: Construction, working principle, types of stepper motors and applications.		

First year Bachelor of Technology

6		Batteries and Electrical Safety	CO 6	04
	6.1	Batteries: Introduction and types of batteries; primary and secondary batteries; battery rating and capacity; charging and discharging of batteries; battery efficiency; series and parallel connection of batteries.		
	6.2	Lead-Acid and Lithium-Ion Batteries: Construction, working principle and characteristics of lead-acid battery; basic construction and working principle of lithium-ion battery; comparison and applications of lead-acid and lithium-ion batteries.		
	6.3	Applications and Electrical Safety: Applications of batteries in automotive, UPS, inverter, portable and renewable-energy systems; basic electrical safety practices; electrical hazards; importance of earthing and its applications.

Internal Assessment:

Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.

Mid Term test is to be conducted when approx. 50% syllabus is completed Duration of the midterm test shall be one hour.

Continuous Assessment:-

Continuous Assessment **is of 20 marks**. The rubrics for assessment will be considered on approval by the subject teachers.

Sr.no	Rubrics	Marks
1.	*Certificate course for 4 weeks or more:- NPTEL/ Coursera/ Udemy/any MOOC	10 marks
2.	Wins in the event/competition/hackathon	10 marks
3.	Content beyond syllabus presentation	10 marks

First year Bachelor of Technology

4.	Creating Proof of concept	10 marks
5.	Mini Project / Extra Experiments/ Virtual Lab	10 marks
6.	GATE Based Assignment test/Tutorials etc	10 marks
7.	Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject(in other institutes)	5 marks
8.	Multiple Choice Questions (Quiz)	5 marks

End Semester Theory Examination:

- 1 Question paper will be of 60 marks
- 2 Question paper will have a total of five questions
- 3 All questions have equal weightage and carry 20 marks each
- 4 Any three questions out of five need to be solved.

Subject :Basic Electrical Engineering Laboratory

Subject: Basic Electrical Engineering Laboratory								
Teaching Scheme

		Internal Assessment		ESE				
		MT	CA					
26CSES11	Basic Electrical Engineering	-	-	-	-	25	-	25

Lab Objectives:

- 1 To impart the basic concept of network analysis and its application.
- 2 To provide the basic concept of ac circuits analysis and its application.
- 3 To illustrate the operation of machines and transformers.

Lab Outcomes:

- LO 1** Interpret and analyze the behavior of DC circuits using network theorems.
- LO 2** Perform and infer experiment on single phase AC circuits.
- LO 3** Demonstrate experiment on three phase AC circuits.

First year Bachelor of Technology

LO 4 Illustrate the performance of single-phase transformers and machines.

Suggested Experiments: Students are required to complete at least 8 experiments.		LO's
Sr. No.	Name of the Experiment	
1	Introduction and use of measuring instruments – voltmeter, ammeter, multi-meter, oscilloscope. Resistors, capacitors, and inductors.	L01,2,3,4
2	Verification of Superposition Theorem.	L01
3	Verification of Thevenin's Theorem.	L01
4	Verification of Norton's Theorem.	L01
5	Verification of Maximum Power Transfer Theorem.	L01
6	To find resonance conditions in a R-L-C series resonance circuit	L02
7	To find resonance conditions in a R-L-C parallel resonance circuit.	L02
8	To find the equivalent circuit parameters by conducting OC and SC tests on single phase transformers.	L03
9	To determine the efficiency of a single-phase transformer at different loads.	L03
10	To demonstrate cut-out sections of the DC machine.	L04
11	To examine the characteristics of AC machines.	L04
12	To investigate the construction and working of primary and secondary batteries.	L04

Term Work:

- 1 Term work should consist of 8 experiments.
- 2 Journal must include at least 2 assignments.
- 3 The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.
- 4 Term Work – 25 Marks.
Term work will be assessed based on the students' performance in the laboratory.

Continuous assessment exam

- 1 Based on the BEE theory and related lab..

First year Bachelor of Technology

Subject :Programming in C

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total
26CSES12	Programming in C	2	2	-	2	1	-	3

Programming in C (Theory)

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total
26CSES12	Programming in C	2	-	-	2	-	-	2

Examination Scheme								
Course Code	Course Name	Theory			Exam Duration (in Hrs)	Term Work	Practical & Oral	Total
		Internal Assessment		ESE				
		MT	CA					
26CSES12	Programming in C	20	-	30	1	-	-	50

Course Objectives:

1. **Understand the fundamentals of programming** by learning algorithms, flowcharts, and the syntax and semantics of the C programming language.
2. **Develop problem-solving skills** by designing and implementing C programs using decision-making, looping, functions, arrays, and strings.
3. **Apply advanced C programming concepts** such as pointers, dynamic memory allocation, structures, and unions to solve real-world programming problems.
4. **Build modular and efficient programs** by following structured programming principles, debugging techniques, and good coding practices.

Course Outcomes:

Student will be able to

CO 1 Explain the fundamentals of C programming, algorithms, flowcharts, data types, operators, and input/output operations to develop simple C programs.

CO 2 Apply decision-making and looping constructs to solve computational problems using C..

CO 3 Develop modular programs using functions, recursion, and storage classes.

CO 4 Implement arrays and strings to store, manipulate, and process data efficiently.

CO 5 Apply structures and unions to represent, organize, and process complex data effectively in C programs.

CO 6 Demonstrate the use of pointers and dynamic memory allocation to develop efficient and flexible C programs.

First year Bachelor of Technology

Module	Content	CO	No. Hrs.
Prerequisite:	Basic understanding of Computer Programming terminologies.		
1	Introduction, Fundamental of C Programming.	CO1	04
	Introduction to components of a Computer System. Introduction to Algorithm and Flowchart Keywords, Identifiers Constants and Variables. • Expression and In-built functions. • Datatype and Operators in C. • Expressions and Precedence of Operators. • In- built Functions, Pre-processor Directives, library, Header Files.		
2	Control Structure, Branching and looping structures	CO2	05
	Introduction to Control Structures. • If statement, If-else statement, Nested if-else, else-if Ladder. • Switch statement • For loop, while loop, do while loop • Break, continue and go to statements		
3	Functions	CO3	05
	Introduction to functions. • Function prototype, Function definition, accessing a function and parameter passing: Call by Value and Call by reference. • Recursive function.		
4	Array and Strings	CO4	04
	Introduction to Arrays. • Declaration and initialization of one. dimensional and two- dimensional arrays. • Definition and initialization of String. • String functions.		
5	Structure and Union	CO5	04
	Concept of Structure and Union. • Declaration and Initialization of structure and union. • Nested structures. • Array of Structures .		
6	Pointers	CO6	04

First year Bachelor of Technology

	Fundamentals of pointers - Declaration, initialization and dereferencing of pointers. - Concept of dynamic memory allocation.		
Total No. of Hours			26

Course Objectives

1. Understand the fundamentals of programming by learning algorithms, flowcharts, and the syntax and semantics of the C programming language.
2. Develop problem-solving skills by designing and implementing C programs using decision-making, looping, functions, arrays, and strings.
3. Apply advanced C programming concepts such as pointers, dynamic memory allocation, structures, and unions to solve real-world programming problems.
4. Build modular and efficient programs by following structured programming principles, debugging techniques, and good coding practices.

Course Outcomes:

CO 1 Explain the fundamentals of C programming, algorithms, flowcharts, data types, operators, and input/output operations to develop simple C programs.

CO 2 Apply decision-making and looping constructs to solve computational problems using C.

CO 3 Develop modular programs using functions, recursion, and storage classes.

First year Bachelor of Technology

CO 4 Implement arrays and strings to store, manipulate, and process data efficiently.

CO 5 Apply structures and unions to represent, organize, and process complex data effectively in C programs.

CO 6 Demonstrate the use of pointers and dynamic memory allocation to develop efficient and flexible C programs.

Suggested Experiments: Students are required to complete at least 8 experiments.

Star (*) marked experiments are compulsory.

Sr. No.	Title of Experiment	CO
1*	Familiarization with Programming Environment a) Develop programs demonstrating formatted and unformatted input/output operations. b) Develop programs demonstrating arithmetic, relational, logical, assignment, unary, conditional, bitwise, and other operators."	CO1
2*	Problems involving Control Structures & Looping a) Develop programs using conditional and branching statements such as if, if-else, nested if, and multi-way selection. b) Develop programs using iterative statements such as while, do-while, and for.	CO2
3*	Problems involving Advanced Control Structures a) Develop programs using nested control structures and switch-case statements. b) Develop programs demonstrating the use of break, continue, and goto statements wherever appropriate."	CO 2
4*	Programs to Demonstrate Simple Functions a) Develop programs using user-defined functions. b) Develop programs demonstrating different methods of passing arguments to functions, including call by value and pointer-based parameter passing.	CO3
5*	Programs to Demonstrate Recursive Functions a) Develop iterative programs to solve mathematical and computational problems. b) Develop recursive programs to solve suitable mathematical and computational problems.	CO3
6	Demonstrate 1D, 2D Arrays a) Develop programs using one-dimensional arrays for data processing operations. b) Develop programs using two-dimensional arrays for matrix and tabular data processing.	CO4
7	Programs to Demonstrate Strings a) Develop programs to perform common string manipulation and processing operations. b) Develop programs to process and manipulate arrays of strings.	CO4
8	Problems involving Structures a) Develop programs to define, initialize, and access structures. b) Develop programs to store and process collections of structured data using structures and arrays of structures. c) Develop programs demonstrating operations on structure members and nested structures.	CO5

First year Bachelor of Technology

9	Programs to Demonstrate the Concept of Pointers a) Develop programs demonstrating pointer declaration, initialization, dereferencing, and pointer arithmetic. b) Develop programs using pointers for data manipulation, arrays, strings, and function parameter passing.	C06
10	Program to Understand the Concept of Dynamic Memory Allocation a) Develop a program to demonstrate dynamic memory allocation for a one-dimensional array, perform suitable data processing operations, and release the allocated memory. b) Develop a program to demonstrate dynamic memory allocation and deallocation using appropriate library functions such as malloc(), calloc(), realloc(), and free().	C06
11*	Micro Project - Develop a small application integrating multiple C programming concepts such as functions, arrays, strings, structures, pointers, and file handling to solve a suitable computational or real-world problem.	C01- C06

Term Work:

1	Journal must include at least 2 assignments on content of practical
2	The final certification and acceptance of term work ensures satisfactory performance of Laboratory work and minimum passing marks in term work.
3	Total 25 Marks = 15 Marks (Experiment) +10 Marks Termwork

Oral & Practical exam : Based on the entire syllabus of theory and practical (25 Marks)

2 Hrs Drawing Hall & 2 Hrs AutoCAD Practical Batchwise

Lab Objectives:

- 1 To impart and inculcate proper understanding of the theory of projection, the knowledge of reading a drawing and to improve the visualization skill.

Lab Outcomes

- LO 1** Apply the basic principles of projections in converting 3-D view to 2-D drawing with and without section.
- LO 2** Read a given drawing and visualize a 3-D object from the given two or three views.

Sr No.	Topic	LO's	Hrs.
1	Orthographic Projections: Fundamentals of orthographic projections. Different views of a simple machine part as per the first angle projection method recommended by I.S.	LO 1	08
2	Sectional Orthographic Projections: Basic concept and significance of sectional orthographic projections. Full sectional view of simple machine parts (Excluding half section).	LO 1	08
3	Isometric Views: Isometric Views, Conversion of Orthographic Views to Isometric Views (Excluding Sphere and circle on an inclined plane).	LO 2	08

Lab Objectives:

- 1 To inculcate the skill of drawing with the basic concepts.
- 2 To Use AutoCAD for daily working processes.
- 3 To teach basic utility of Computer Aided drafting (CAD) tool

Lab Outcomes: Students will be able to...

- LO 1** Apply the basic principles of projections in 2D drawings using CAD software.
- LO 2** Create, Annotate, Edit and Plot drawings using basic AutoCAD commands and features.
- LO 3** Apply basic AutoCAD skills to draw different views of a 3D object.
- LO 4** Apply basic AutoCAD skills to draw the isometric view and 3-D models from the given two views.

Sr No.	Topic	LO's	Hrs.
1	Overview of Computer Graphics Covering: Listing the computer technologies that impact on graphical communication, demonstrating knowledge of the theory of CAD software such as: The Menu System, Toolbars (Standard, Object Properties, Draw, Modify and Dimension), Drawing Area (Background, Crosshairs, Coordinate System), Dialog boxes and windows, Shortcut menus (Button Bars), The Command Line (where applicable), The Status Bar, Different methods of zoom as used in CAD, Select and erase objects.	LO1,3,4	08

First year Bachelor of Technology

2	Customization & CAD Drawing: Consisting of set up of the drawing page and the printer including scale settings, Setting up of units and drawing limits, ISO and ANSI standards for coordinate dimensioning.	L02,3, 4	08
3	Annotations and other Functions Covering: Applying dimensions to objects, applying annotations to drawings, Changing line lengths through modifying existing lines (extend/lengthen), Printing documents to paper using the print command, orthographic projection techniques, Drawing sectional views of objects (simple machine parts), Drawing isometric views by using Isometric drafting. Visualizing and drawing 3-D models by using AutoCAD 3-D software.	L02,3, 4	08 04
	Total Practical Hours		28

Course Objectives

1. Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence.
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

Course Outcomes

CO 1 Understand self-exploration, natural acceptance, happiness, prosperity and human aspirations.

CO 2 Understand the harmony between the Self ('I') and Body, including Sanyam, health and prosperity.

CO 3 Understand the Constitution of India, Fundamental Rights, Directive Principles and constitutional remedies.

First year Bachelor of Technology

Module	Content	CO's	Hrs
1	Course Introduction - Need, Basic Guidelines, Content and Process for Value Education	CO 1	06
	1.1 Purpose and motivation for the course, recapitulation from Universal Human Values-I		
	1.2 Self-Exploration-what is it? - Its content and process; 'Natural Acceptance' Continuous Happiness and Prosperity-Right understanding		
	1.3 Continuous Happiness and Prosperity-Right understanding		
	1.4 Relationship and Physical Facility		
	1.5 Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario		
	1.6 Method to fulfill the above human aspirations: understanding and living in harmony at various levels.		
2	Understanding Harmony in the Human Being - Harmony in Myself!	CO 2	04
	2.1 Understanding human being as a co-existence of the sentient 'I' and the material 'Body'		
	2.2 Understanding the needs of Self ('I') and 'Body' - happiness and physical facility		
	2.3 Understanding the Body as an instrument of 'I', Understanding the characteristics and activities of 'I' and harmony in 'I'		
	2.4 Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail		
3	Introduction : The Constitution of India and Fundamental Rights (NPTEL Video Lecture)	CO 3	06
	3.1 Introduction to Constitution and Constitutional Law Constitution, Constitutionalism and Constitutional Law Difference between Constitutional law and other laws Types of Constitution Salient Features of the Constitution of India Preamble to the Constitution of India: Its Role, Vision, Interpretation and Amendment		
	3.2 Fundamental Rights and Directive Principles of State Policy 1. Concept of Fundamental Rights vis a vis Directive Principles of State Policy 2. Definition of State and Instrumentalities of State 3. Enumerated Fundamental Rights 4. Enforceability of Fundamental Rights vis -a -vis Directive Principles of State Policy 5. Primacy of Fundamental Rights and Directive Principles of State Policy 6. Constitutional Remedies to derogation of Fundamental Rights		
	Total		26

First year Bachelor of Technology

Mode of Conduction

1. Lecture hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them.
2. practice sessions for analyzing and discussing the topic, help the students explore the important or critical elements.

Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

Sr. No	Rubrics	Marks
1.	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	10 marks
2.	Case study analysis and presentation	10 marks
3.	Constitutional awareness programme	10 marks
4.	Group discussion/debate on social and ethical issues	10 marks
5.	Poster Presentation on UHV content theme	10 marks
6.	Book Review on UHV content theme	10 marks
7.	Community/social outreach activity with report	10 marks
8.	Case Study Analysis & Presentation	10 marks
9.	Survey/interview on values, happiness, prosperity or social harmony	10 marks

Social Responsibility, Community Engagement and Student Well-Being

As part of the **First Year curriculum**, students are allotted **25 marks in each semester** for participation in structured social responsibility and community engagement activities. The initiative is designed to extend learning beyond the classroom and encourage students to become responsible, empathetic and socially conscious citizens.

Students participate in a diverse range of activities, including **cleanliness drives on college premises, awareness rallies, tree plantation drives, beach-cleaning campaigns, environmental awareness initiatives, cultural programmes, community outreach activities and other socially relevant projects**. These activities provide students with opportunities to work collaboratively, engage with the community and contribute meaningfully to society.

The programme also incorporates **student well-being and personal development activities**, including courses and workshops on **Yoga, stress management, emotional well-being, mindfulness, self-awareness and healthy lifestyle practices**. Such activities enable students to develop effective coping strategies, emotional balance, self-discipline and a positive approach towards academic and personal challenges.

VIVEKANAND EDUCATION SOCIETY'S Institute of Technology

(An Autonomous Institute Affiliated to University of Mumbai, Approved by A.I.C.T.E & Recognized by Govt. of Maharashtra)

First year Bachelor of Technology

Through this integrated approach, the initiative promotes **social responsibility, civic engagement, environmental consciousness, teamwork, empathy, self-awareness and holistic well-being**. It supports the institution's commitment to developing well-rounded graduates who are not only technically competent but also socially responsible, emotionally resilient and actively engaged with their community.

Assessment Rubrics:

Sessions from eminent persons on important themes like cyber bullying, cancer awareness, organ donation etc.
(5 Marks)

Yoga Course (15 Marks)

***Tutorial is conducted batch-wise.**

Course Objectives:

To develop a strong foundation in linear algebra, complex variables, multivariable and vector calculus, and differential equations, enabling students to analyze mathematical models, solve theoretical and applied problems, and apply advanced mathematical techniques in science, engineering, and related disciplines.

Course Outcomes:

After successful completion of the course, students will be able to:

CO 1 Solve higher order linear differential equations, apply analytical methods for homogeneous and non-homogeneous equations, analyze initial and boundary value problems.

CO 2 Classify and formulate partial differential equations, solve standard PDEs using analytical methods.

CO 3 Solve problems involving harmonic functions and analytic functions,

CO 4 Able to expand complex functions into Taylor and Laurent series and identify zeros and singularities, apply the residue theorem to compute contour integrals and certain real integrals.

First year Bachelor of Technology

CO 5 Apply vector calculus concepts such as gradient, divergence, curl, to engineering problems.

CO 6 Evaluate double integrals over different regions using Cartesian, polar, coordinate systems.

Module	Content	CO	No. Hrs.
Prerequisite:	Single-variable differentiation, Integration, Coordinate geometry, Algebra, Permutations and combinations, Graph interpretation, Complex numbers, Infinite sequences and series, Trigonometric series, Integration techniques, Differential equations, Matrix operations, Calculus, Matrices and vectors, Coordinate geometry, Linear equations.		
1	Higher order differential Equations	CO1	07
	1.1 Homogeneous and nonhomogeneous equations, Initial value problems (IVP), Boundary value problems (BVP), 1.2 Solution using operator D method, Method of variation of parameters.		
2	Partial Differential Equations	CO2	06
	2.1 Formation of PDE. Solution of first-order PDE using Lagrange's method. Introduction to second-order PDEs (basic idea). 2.2 Solution of PDE by separation of variables, Applications in engineering systems.		
3	Complex Differentiation	CO3	06
	3.1 Limits, continuity, and differentiability, Analytic functions. 3.2 Cauchy-Riemann equations. Harmonic functions, Orthogonal trajectories.		
4	Complex Integration	CO4	07
	4.1 Complex integration: Cauchy's integral theorem and applications, Taylor's and Maclaurin series, 4.2 Types of singularities, Residues, Cauchy-residue theorem and applications		
5	Vector Calculus	CO5	06
	5.1 Scalar and vector point functions. Gradient, Directional derivative, divergence, curl, 5.2 Solenoidal and irrotational field, Surface Normal, Idea of Tangent Plane		
6	Double Integration	CO6	07
	6.1 Double Evaluation over a given region, Change of order and Change of coordinates. 6.2 Applications in engineering systems using Initial and boundary value problems. Application to find Area, mass.		
	Total No. of Hours		39

First year Bachelor of Technology

Internal Assessment: One Mid Term Test of 20 marks and Continuous Assessment of 20 marks.

Mid Term Test:

- The Mid Term Test is to be conducted when approximately 50% syllabus is completed.
- The duration of the Mid Term Test will be one hour.

Continuous Assessment:

The assessment rubrics will be finalized with the approval of the subject teacher. Three rubrics will be selected from the list below, and the best two scores will be considered for the final assessment.

First year Bachelor of Technology

Sr.No	Rubrics	Marks
1	Multiple Choice Questions/ Quiz	5 Marks
2	Problem-solving assignments	10 Marks
3	Case Study / Presentation	10 Marks
4	Statistical Data Analysis	10 Marks
5	Tutorials/ Class tests	10 Marks
6	MOOC / NPTEL Certification	10 Marks
7	Peer Review and Participation	5/10 Marks
8	GATE Based Assignments / Tutorials	10 Marks
9	Group problem-solving activities	10 Marks

End Semester Theory Examination:

- The question paper will be of 60 marks.
- There will be a total of five questions.
- All questions have equal weightage and carry 20 marks each.
- Any three questions out of five need to be solved.
- The duration of the **ESE** will be **two hours**.

First year Bachelor of Technology

Subject : Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total
26CSES21	Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming	3	2	-	3	1	-	4

Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming (Theory)

Course Objectives:

1. Understand OOP concepts, program structure, I/O & control statements
2. Learn classes, constructors, arrays, strings & wrapper classes
3. Understand packages, access modifiers, inheritance, interfaces & collections
4. Learn exception types, handling mechanism & custom exceptions
5. Understand thread concepts & lifecycle
6. Learn GUI concepts, components & event-driven programming

Course Outcomes:

After successful completion of the course students will be able to:

CO 1 Understand the basic structure of Java programs and apply variables, operators, input/output operations, and control statements to solve simple programming problems.

CO 2 Develop programs using classes, constructors, arrays, strings, and wrapper classes to implement object-oriented programming concepts.

CO 3 Organize programs using packages and access modifiers and apply inheritance, interfaces, and collection classes

First year Bachelor of Technology

such as ArrayList to build modular applications.

CO 4 Identify different types of exceptions and implement exception handling techniques, including try-catch blocks, exception propagation, and user-defined exceptions.

CO 5 Demonstrate the use of multithreading by creating and managing threads and explaining the thread lifecycle in Java applications.

CO 6 Design and implement basic graphical user interface (GUI) applications using AWT and Swing components with event-driven programming.

Module	Contents	CO's	Hrs
Prerequisite	Basic knowledge of programming fundamentals and Problem solving		
1	Introduction to Java and Programming Fundamentals 1.1. Introduction to Object Oriented Programming (OOP): Procedure Oriented Programming (POP) vs OOP, OOP Concepts 1.2. Java Platform Overview: Features, Java Program Structure, Development Environment, Compilation & Execution Process, JDK, JRE and JVM 1.3. Console I/O: Output using print() & println(), Input using Scanner class, Reading integer, floating & string values 1.4. Basic Programming Constructs: Variables, Data Types, Type Conversion & Type Casting, Operators (Arithmetic, Relational, Logical, Assignment, Bitwise), Special operators 1.5. Expressions & Control Statements: Conditional(if, if-else, switch, etc.), Looping (for, for each, while, do-while), break & continue	CO 1	8
2	Classes, Objects & Core Structures 2.1. Classes & Objects: Class, object, Data Members & Member Methods, Constructors (with types) and Method Overloading 2.2. Static Members: variables, methods & blocks 2.3. Arrays: 1D arrays, Multidimensional arrays & operations 2.4. String Handling: String class, StringBuffer, StringBuilder & Common string methods 2.5. Wrapper & Autoboxing: Primitive data types vs Wrapper classes, Autoboxing & Unboxing	CO 2	7
3	Packages, Access & Inheritance 3.1. Packages: Built-in packages, Creating User-defined packages & Importing packages 3.2. Access Modifiers: public, private, protected & default access and their scope	CO3	7

First year Bachelor of Technology

	3.3. Inheritance: Concept and need of inheritance, Types, Method overriding, dynamic method dispatch & super keyword 3.4. Abstract: Abstract Class & Abstract methods 3.5. Interfaces: Concept, Implementation, Multiple inheritance using interfaces & keywords (extends, implements & final) 3.6. Collections: Limitations of arrays, Collections Framework, ArrayList class & ArrayList basic methods (add(), remove(), get(), size())		
4	Exception Handling 4.1. Introduction: Types of errors, Checked & Unchecked exceptions 4.2. Exception Handling Mechanism: try, catch(with multiple catch) & finally blocks 4.3. Working: Exception Propagation (throw,throws keywords) 4.4. User Defined: Defining & Creating Custom Exception	CO 4	6
5	Multithreading 5.1. Multithreading: Process vs Thread & Benefits of Multithreading 5.2. Thread Lifecycle: Thread states & Lifecycle 5.3. Thread Creation: Creating threads by extending the Thread class & Implementing Runnable interface 5.4. Thread Methods: start(), sleep(), join() & yield()	CO 5	6
6	Graphical User Interface (GUI) Programming in Java 6.1. GUI Basics: Introduction to GUI & Event-driven programming concept 6.2. Swing: Swing components & Layout managers 6.3. JavaFX Introduction: Basic components (Button, Canvas) & Simple animation and charts	CO 6	5
Total			39

Internal Assessment:

- 1 Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks.
- 2 Mid Term test is to be conducted when approx 50% syllabus is completed.
- 3 The duration of the midterm test shall be one hour.

Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

Sr. No	Rubrics	Marks
1	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	10 Marks
2	Wins in the event/competition/hackathon	10 marks
3	Content beyond syllabus presentation	10 marks
4	Creating Proof of concept	10 marks
5	Mini Project / Extra Experiments/ Virtual Lab	10 marks
6	GATE Based Assignment test/Tutorials etc	10 marks
7	Participation in event/workshop/talk/competition followed by small report and certificate of participation relevant to the subject (in other institutes)	05 marks
8.	Multiple Choice Questions (Quiz)	05 marks
9.	Peer Review and participation	05 Marks

End Semester Theory Examination:

- 1 Question paper will be of 60 marks
- 2 Question paper will have a total of five questions
- 3 All questions have equal weightage and carry 20 marks each
- 4 Any three questions out of five need to be solved.

First year Bachelor of Technology

Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming (Laboratory)

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total
26CSES21	Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming	-	2	-	-	1	-	1
Examination Scheme								
Course Code	Course Name	Theory		Exam Duration (in Hrs)	Term Work	Practical & Oral	Total	
		Internal Assessment						
		MT	CA					
26CSES21	Fundamentals of Programming: Object Oriented Programming Methodology - Java Programming	-	-	-	-	25	-	25

Lab Objectives:

- 1 Understand OOP concepts, program structure, I/O & control statements
- 2 Learn classes, constructors, arrays, strings & wrapper classes
- 3 Understand packages, access modifiers, inheritance, interfaces & collections
- 4 Learn exception types, handling mechanism & custom exceptions
- 5 Understand thread concepts & lifecycle
- 6 Learn GUI concepts, components & event-driven programming

Lab Outcomes:

After successful completion of the Lab students will be able to:

- L01** Understand the basic structure of Java programs and apply variables, operators, input/output operations, and control statements to solve simple programming problems.
- L02** Develop programs using classes, constructors, arrays, strings, and wrapper classes to implement object-oriented programming concepts.
- L03** Organize programs using packages and access modifiers and apply inheritance, interfaces, and collection classes such as ArrayList to build modular applications.
- L04** Identify different types of exceptions and implement exception handling techniques, including try-catch blocks, exception propagation, and user-defined exceptions.
- L05** Demonstrate the use of multithreading by creating and managing threads and explaining the thread lifecycle in Java applications.
- L06** Design and implement basic graphical user interface (GUI) applications using AWT and Swing components with event-driven programming.

First year Bachelor of Technology

Suggested Experiments: Students are required to complete at least 10 experiments.

Sr. No.	Experiment Topic	LO
1	Basic Programming Constructs (Arithmetic operations, number problems such as prime, factorial, Fibonacci, palindrome, and simple logic-based programs.)	L01
2	Control Statements and Operators (Switch statements, bitwise operators, loops, string counting operations, patterns.)	L01
3	Classes and Constructors (Class design, object creation, constructors, encapsulation, and basic object-oriented programming concepts.)	L02
4	Static Members, Arrays and Wrapper Classes (Static variables and methods, array operations, matrix operations, sorting algorithms, searching techniques, and wrapper classes.)	L01, L02
5	String Handling (String manipulation, string methods, palindrome checking, word operations, character frequency, and mutable strings using StringBuffer and StringBuilder.)	L01, L02
6	Packages and Access Modifiers (User-defined packages, importing packages, access control using public/private/protected/default modifiers, and modular program organization.)	L03
7	Inheritance (Types of inheritance such as single, multilevel, and hierarchical inheritance, along with method overriding and dynamic method dispatch.)	L02, L03
8	Abstract Classes and Interfaces (Abstraction using abstract classes, interface implementation, multiple inheritance using interfaces, and use of the final keyword.)	L02, L03
9	Collections (ArrayList) (Dynamic data structures using ArrayList, collection methods, sorting, searching, and storing objects in collections.)	L02, L03
10	Exception Handling (Handling runtime errors using try-catch-finally, multiple catch blocks, throw/throws keywords, custom exceptions, and exception propagation.)	L04
11	Multithreading Thread creation and management, thread methods	L05
12	Graphical User Interface (GUI) Programming Development of GUI applications using Swing.)	L06

First year Bachelor of Technology

Note: Suggested List of Experiments is indicative. However, flexibility lies with individual course instructors to design and introduce new, innovative, and challenging experiments (limited to a maximum 30% variation to the suggested list) from within the curriculum, so that the fundamentals and applications can be explored to give greater clarity to the students and they can be motivated to think differently.

Term Work:	
1	Term work should consist of experiments and mini projects covering all above mentioned topics.
2	The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.
3	Total 25 Marks based on assessment of laboratory work and mini project

First year Bachelor of Technology

Subject : Programme Core Course: Digital Logic & Computer Organization & Architecture

Teaching Scheme								
Course Code	Course Name	(Teaching Hours)			Credits Assigned			
		Th	Pr	Tut	Th	Pr	Tut	Total
26CSPC21	Digital Logic & Computer Organization & Architecture	2	-	-	2	-	-	2

Programme Core Course: Digital Logic & Computer Organization & Architecture (Theory)

</

Course Objectives

- 1 To have an understanding of the basic structure, operation of digital circuits and computer organization & architecture.
- 2 To discuss combinational and sequential circuits in digital systems.
- 3 To explore processor organization along with functions of the control unit.
- 4 To study memory organization.

Course Outcomes: Students will be able

- CO 1** To understand the fundamentals of digital logic and number systems, and perform various arithmetic operations using binary number representations.
- CO 2** To design combinational circuits using K-map.
- CO 3** To analyze the operation of sequential circuits.
- CO 4** To explore the basics of processor organization and architecture.
- CO 5** To understand the concept of a control unit.
- CO 6** To describe the memory organization.

First year Bachelor of Technology

Mod ule	Content		CO's	Hrs
Prer equi site:	Knowledge on number systems.			
1	Basics of digital logic		CO 1	06
	1.1	Introduction to Binary, Decimal, Octal, and Hexadecimal number systems and conversion. Introduction to Codes: Grey, BCD.		
	1.2	Basic concepts of Boolean laws, basic gates and universal gates.		
	1.3	Sum of products and products of sum, minimization with Karnaugh Map (up to four variables).		
	1.4	Binary Arithmetic: Addition, subtraction, multiplication, and division, sign magnitude, 1's and 2's complement method of data representation, subtraction using 1's and 2's complement method.		
2	Combinational Circuits		CO 2	03
	2.1	Introduction to combinational circuits, Half adder and Full adder implementation using K-map.		
	2.2	Introduction, block diagram and truth table of Multiplexer (2:1, 4:1), Demultiplexer (1:2, 1:4), Encoder (8:3) and Decoder (3:8), Implementation of 4:1 using 2:1 MUX.		
3	Sequential Circuits		CO 3	05
	3.1	Introduction to sequential circuits, Flip-Flops: SR, JK, D, T (Block diagram and truth table).		
	3.2	Basics of counters, 2 bit up counter and 2 bit down counter (only negative edge triggered counter) along with timing diagram. Block representation of 3-bit Shift registers using flip flops (SISO and SIPO).		
4	Processor organization and architecture		CO 4	05
	4.1	Basics of computer organization and architecture, Von- Neumann model.		
	4.2	Basic bus structure, Types of buses: Address bus, data bus and control bus.		
	4.3	Register organization, Instruction formats, Addressing modes: immediate, register, direct, indirect, implied, Instruction cycle: fetch, decode, execute, interrupt.		
5	Control unit		CO 5	03
	5.1	Introduction to control unit, its functions with block diagram representation.		
	5.2	Booth's multiplication algorithm with example.		
6	Memory organization		CO 6	04
	6.1	Introduction to memory and memory characteristics and memory hierarchy.		

First year Bachelor of Technology

	6.2	Cache Memory: Concept, need of cache memory, locality of reference, cache mapping methods, design problems based on direct mapping technique.		
		Total		26

First year Bachelor of Technology

Internal Assessment		
Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 20 marks. The Mid Term test is to be conducted when approximately 50% syllabus is completed and its duration will be one hour.		
Continuous Assessment		
Continuous Assessment is of 20 marks. The rubrics for assessment will be considered upon approval by the subject teachers. It should be a minimum of 2 or a maximum of 4 from the following table		
Sr. No.	Rubrics	Marks
1	Multiple Choice Questions (Quiz)	5
2	Literature review of papers/journals	5
3	Participation in event/workshop/talk/competition followed by a small report and certificate of participation relevant to the subject	5
4	Wins in the event/competition/hackathon pertaining to the course	10
5	Case study, Presentation, group discussion, technical debate on recent trends in the said course	10
6	Project-based Learning and evaluation / Extra assignment / Question paper solution	10
7	NPTEL/ Coursera/ Udemy/any MOOC Certificate course for 4 weeks	10
8	Content beyond syllabus presentation	10
9	Creating Proof of Concept	10
10	Mini Project / Extra Experiments/ Virtual Lab	10
11	GATE Based on Assignment tests/Tutorials etc	10
12	Peer Review and participation	5/10
*For sr.no.7, the date of the certification exam should be within the term, and in case a student is unable to complete the certification, the grading has to be done accordingly.		
End Semester Theory Examination		
1	Question paper will be of 60 marks	
2	Question paper will have a total of five questions	
3	All questions have equal weightage and carry 20 marks each	
4	Any three questions out of five need to be solved.	

First year Bachelor of Technology

26AE21	Professional Communication and Ethics-I	20	80	-	-	-	-	100

*The two-hour tutorial is divided into batches of 20 - 30 students.

Course Objectives:

- 1 To demonstrate the fundamental concepts of interpersonal and professional communication.
- 2 To encourage active listening with focus on content, purpose, ideas and tone.
- 3 To facilitate fluent speaking skills in social, academic and professional situations
- 4 To train in reading strategies for comprehending academic and business correspondence.
- 5 To promote effective writing skills in business, technology and academic arenas.
- 6 To inculcate confident personality traits along with grooming and social etiquettes.

Course Outcomes:

- CO 1** Eliminate barriers and use verbal/non-verbal cues at social and workplace situations.
- CO 2** Employ listening strategies to comprehend wide-ranging vocabulary, grammatical structures, tone and pronunciation.
- CO 3** Prepare effectively for speaking at social, academic and business situations.

First year Bachelor of Technology

CO 4 Use reading strategies for faster comprehension, summarization and evaluation of texts.

CO 5 Acquire effective writing skills for drafting academic, business and technical documents.

CO 6 Successfully interact in all kinds of settings, displaying refined grooming and social skills

Module	Content	CO	No. Hrs.
1	Fundamentals of Communication: -	CO1	04
	1.1. Introduction to Theory of Communication • Definition • Objectives • The Process of Communication • Organizational Communication 1.2. Methods of Communication		
2	Vocabulary Building	CO2	02
	2.1. Vocabulary Building • Meaning of Words in Context • Synonyms & Antonyms • Collocations • Prefixes & Suffixes 2.2. Grammar • Identifying Common Errors ○ Subject - Verb Agreement ○ Misplaced Modifiers ○ Articles ○ Prepositions • Tautologies • Pleonasms (Redundancies) • Idioms		
3	Business Correspondence	CO3	03
	3.1 Seven Cs of Business Correspondence • Completeness • Conciseness • Consideration • Concreteness • Clarity • Courtesy • Correctness 3.2. Parts of a Formal Letter and Formats • Parts/Elements of a Formal Letter		

First year Bachelor of Technology

	○ Letterheads and/or Sender's Address ○ Dateline ○ Inside Address ○ Reference Line (Optional) ○ Attention Line (Optional) ○ Salutation ○ Subject Line ○ Body ○ Complimentary Close ○ Signature Block ○ Enclosures/Attachments ● Complete/Full Block Format 3.3. Emails ● Format of Emails ● Features of Effective Emails ● Language and style of Emails 3.4. Types of Letters in Both Formal Letter Format and Emails ● Claim and Adjustment Letters ● Request/Permission Letters ● Sales Letters		
4	Personality Development and Social Etiquettes	C04	02
	4.1 Personality Development ● Introducing Self and/or a Classmate ● Formal Dress Code 4.2. Social Étiquettes ● Formal Dining Étiquettes ● Cubicle Étiquettes ● Responsibility in Using Social Media ● Showing Empathy and Respect ● Learning Accountability and Accepting Criticism ● Demonstrating Flexibility and Cooperation ● Selecting Effective Communication Channels		
5	Book Review	C05	02
	● Review of a book.: Students have to read and analyze the book given and should be able to write a two page review on it. ● Book review presentation		
	Total Engagement Hours		13

First year Bachelor of Technology

List of Tutorials:

S.No	Details of Assignment	Details of Activity	Hours	Marks
1	Personal Branding & SWOT Analysis	Written SWOT analysis along with a 2-minute elevator pitch video recording.	2	5
2	Transcription of the public speech along with on the spot writing of speech/Extempore	Public speech/On-the-spot 1-minute Extempore presentation.	2	10
3	Case Studies/Role plays on types of communication, Barriers to effective Communication and its consequences.	Role Play/Case Study	4	10
4	Written record of reading activities/	Advanced level reading comprehension with MCQs/Video analysis, structured note-taking (Cornell Method), comprehension assessment, and oral reflection.	2	5
5	Listening Skill Activity TED Talk Active Listening & Speech Analysis	Video analysis, structured note-taking (Cornell Method), comprehension assessment, and oral reflection.	2	5
6	Aptitude test	Aptitude test on vocabulary and grammar for Engineers	4	5
7	2 types of letters in complete block format/Email	Request/ Permission; Adjustment / claim; Sales letters	4	10
8	Understanding of Social Etiquettes	Mini Project	2	10
9	Presentation on Book Review	Exploration and Analysis of perception related to global environment presented in the Book	4	20
10	Wins in the event/competition related to soft skills /language/literature	Providing certificate as proof/Geo Tagged Photographs	During the current semester	10
11	Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes)	Providing certificate as proof/Geo Tagged Photographs	During the current semester	5

First year Bachelor of Technology

12	Beyond the Headlines: 15-Day Newspaper Analysis Project	Background research → multiple perspectives → evidence → ideation → critical analysis → personal position → conclusion. Report plus presentation.	Self Paced	10
13	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	Any course related to soft skills and personality development	During the current semester	10
(List of books for book review will be scrutinised by the respective teachers.)

- 8 Lewis, N. (2014). Word power made it easy. Random House USA.

Internal Assessment:

- 1) Assessment consists of one Mid Term Test of 20 marks and Continuous Assessment of 80 marks.
- 2) Mid Term test is to be conducted when approx. 60% syllabus is completed.
- 3) Duration of the midterm test shall be one hour.

Continuous Assessment:

Continuous Assessment is of **80 marks**. The rubrics for assessment will be considered on approval by the subject teachers.

First year Bachelor of Technology

Sr. No	Rubrics	Marks
1.	Evaluation of self-awareness, establishes a distinctive professional identity, and communicates personal strengths with confidence and clarity.	5 Marks
2.	Accurate transcription, clear structure of ideas, relevant content, fluent expression, appropriate vocabulary, and confident extempore delivery.	10 marks
3.	Conceptual Understanding – Case Analysis – Communication Effectiveness – Role Play – Problem Resolution	10 marks
4.	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	10 marks
5.	Wins in the event/competition/hackathon	10 marks
6.	Content beyond syllabus presentation	10 marks
7.	Creating Proof of concept	10 marks
8.	Mini Project	10 marks
9.	Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes)	05 marks
10.	Multiple Choice Questions (Quiz)	15 marks
11.	Examination of correct format, clarity of content, professional tone, language accuracy, and appropriate vocabulary.	10 marks
12.	Evaluation of understanding of the book, critical analysis, interpretation of themes, independent perspective, and effective presentation.	20 marks

		Internal Assessment		ESE				
		MT	CA					
26CSIK21	Fundamentals of Vedic Mathematics	-	20	-	-	-	-	20

Course Objectives

1. Students will gain an understanding of the origins, history, and philosophy behind Vedic Mathematics, which is based on ancient Indian mathematical techniques found in the Vedas.
2. They will develop skills to perform arithmetic operations such as addition and subtraction quickly and efficiently.
3. They will learn various techniques to perform multiplication with any number of digits using Vedic Sutras and also learn to perform multiplication in algebra to solve equations.
4. They will learn various techniques to find squares and square roots of any number of digits using Vedic Sutras.
5. They will learn various techniques to find cubes, fourth powers, cube roots and fourth roots of any number of digits using Vedic Sutras.

Course Outcomes

- CO 1** Students will develop the ability to perform mathematical calculations mentally and quickly using Vedic techniques.
- CO 2** Students will enhance their mental math skills and perform arithmetic operations such as addition, subtraction, multiplication and division mentally.
- CO 3** They will learn to apply Vedic Sutras and methods to solve a wide range of mathematical problems, including algebraic equations.
- CO 4** They will be able to break down complex problems into simpler steps and apply Vedic techniques to arrive at solutions more easily.
- CO 5** They will learn alternative approaches and multiple methods to solve mathematical problems, fostering creativity and adaptability in problem-solving.

First year Bachelor of Technology

Module	Content	CO's	Hrs
1	History and evolution of Vedic Mathematics	CO 1	1
	1.1 Historical facts about Vedic Mathematics		
	1.2 Sutras and sub sutras of Vedic Mathematics		
2	Vedic sutras for addition and subtraction	CO 2	4
	2.1 Addition using dot method (Vedic sutras:Ekadhikēpurvena)		
	2.2 Addition without carrying (Vedic sutras: Purnapurnabhyam,sankalan vyavkalanabhyam)		
	2.3 Subtractions using all from 9 last from 10 (Vedic sutras:Nikhilam Navatascaramam dasatah, Vinculum method)		
	2.4 Subtraction using digit separator method (general Method)		
3	Vedic sutras for multiplication	CO 3	9
	3.1 Multiplication by dot and stick method(General Method) (Vedic sutras:Urdhva triyang [Vertically and crosswise])		
	3.2 Multiplication when numbers are very close to base (all cases) (Vedic sutras:Nikhilam Navatashcaramam dashatah)		
	3.3 Multiplication based on vedic sutra Antyayordashakepi and Antyayoshatakepi		
	3.4 Multiplication when numbers are very far from the base (all cases) (Vedic sutras:Anurupyena)		
	3.5 Multiplication of three and four numbers		
	3.6 Multiplication by series of 9 and series of 1		
	3.7 Multiplication by observation		
	3.8 Multiplication of binomial equation		
	3.9 Multiplication of algebraic polynomials		
4	Square and Square Root	CO 4	6
	4.1 Vedic Methods of finding squares:- 1. Ekadhikena Purvena 2. Yavadunam Tavduni kritya vargena Yojayet 3. Urdhva Tiryagbhyam 4. Duplex method		
	4.2 Vilokanam and Duplex Vedic Method of finding square root		
5	Cube ,Cube root, Fourth Power of a number and Fourth root of a number	CO 5	6
	5.1 Vedic Methods of finding cubes:- Yavadunam,Anurupyena,Nikhilam		

First year Bachelor of Technology

	5.2	Vilokanam and Beejank for finding the cube root of any number		
	5.3	Pascal triangle, the method of finding the fourth power of a number		
	5.4	Vilokanam method for finding out the fourth root of a number .		
		Total		26

Text Books

1. Vedic Mathematics by Jagadguru Sankracharya Bharti Krishna Tirthaji Maharaj
2. The Essentials of Vedic Mathematics by Rajesh Kumar Thakur, Rupa Publication

Reference Books

1. Advanced Vedic Mathematics by Rajesh Kumar Thakur, Rupa Publication
2. Vedic Mathematics Made Easy by Dhaval Bhatia, Jaico Publishing House
3. Vedic Mathematics: Sixteen Simple Mathematical Formulae from the Vedas by Bharti Krishna Tirthaji Maharaj, Motilal Banarsidass Publishers Pvt. Ltd.

Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

Sr. No	Rubrics	Marks
1.	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	10 marks
2.	Mathematical Puzzle/Problem-Solving Activity – Use of observation and logical thinking	10 marks
3.	Content beyond syllabus presentation	10 marks
4.	Sutra Identification Activity – Selection of appropriate Sutra for a given problem	10 marks
5.	Sutra Based Assignment test/Tutorials etc	10 marks
6.	Participation in event/workshop/talk / competition followed by small report and certificate of participation relevant to the subject (in other institutes)	10 marks
7.	Multiple Choice Questions (Quiz)	10 marks
8.	Comparative Assignment – Vedic method versus conventional method	10 marks
9.	Sutra-Based Assignment – Application of Vedic Sutras	10 marks

26VE22	Universal Human Values-II	-	20	-	-	-	-	20

Course Objectives

1. Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
2. Understanding of the harmony in the human being, family, society and nature/existence.
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

Course Outcomes:

CO 1 Understand values, trust, respect and mutual happiness in human relationships and family.

CO 2 Understand harmony in society, comprehensive human goals and the concept of universal human order.

CO 3 Understand harmony in nature, coexistence and the interconnectedness of all existence.

CO 4 Develop understanding of human values, ethical conduct and professional ethics for a harmonious society.

First year Bachelor of Technology

Module	Content	CO's	Hrs
1	Understanding Harmony in the Family - Harmony in Human-Human Relationship	CO 1	06
	1.1 Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and its fulfillment to ensure mutual happiness		
	1.2 Understanding the meaning of Trust; Difference between intention and competence		
	1.3 Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship		
2	Understanding Harmony in Society	CO 2	05
	2.1 Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals		
	2.2 Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family		
3	Understanding Harmony in the Nature and Existence - Whole existence as Coexistence	CO 3	06
	3.1 Understanding the harmony in the Nature		
	3.2 Understanding Existence as Coexistence of mutually interacting units in all-pervasive space		
	3.3 Holistic perception of harmony at all levels of existence.		
4	Implications of the above Holistic Understanding of Harmony on Professional Ethics	CO 4	09
	4.1 Natural acceptance of human values		
	4.2 Definitiveness of Ethical Human Conduct		
	4.3 Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order		
	4.4 Competence in professional ethics		
	Total		26

First year Bachelor of Technology

Mode of Conduction

1. Lecture hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them.
2. practice sessions for analyzing and discussing the topic, help the students explore the important or critical elements.

Continuous Assessment:

Continuous Assessment is of **20 marks**. The rubrics for assessment will be considered on approval by the subject teachers. The rubrics can be any 2 or max 4 of the following:

Sr. No	Rubrics	Marks
1.	Certificate course for 4 weeks or more: NPTEL/ Coursera/ Udemy/any MOOC	10 marks
2.	Case study analysis and presentation	10 marks
3.	Constitutional awareness programme	10 marks
4.	Group discussion/debate on social and ethical issues	10 marks
5.	Poster Presentation on UHV content theme	10 marks
6.	Book Review on UHV content theme	10 marks
7.	Community/social outreach activity with report	10 marks
8.	Case Study Analysis & Presentation	10 marks
9.	Survey/interview on values, happiness, prosperity or social harmony	10 marks

First year Bachelor of Technology

Subject : Basic Workshop Practice

Teaching Scheme

26CSVS21	Basic Workshop Practice	-	-	-	-	50	-	50

Lab Objectives:

1. To impart training to help the students develop engineering skill sets.
2. To inculcate respect for physical work and hard labor.
3. To get exposure to interdisciplinary engineering domain.

Lab Outcomes:

Students will be able to...

LO 1 Develop the necessary skill required to handle/use different fitting tools.

LO 2 Develop the necessary skill required to handle/use different carpentry tools.

LO 3 Develop skills required for hardware maintenance, able to install an operating system and system drives and able to identify the network components and perform basic networking and crimping.

LO 4 Identify and understand the safe practices to adopt in the electrical environment, demonstrate the wiring practices for the connection of simple electrical load/equipment and design, fabricate and assemble PCB.

First year Bachelor of Technology

Sr No.	Topic	LO's	Hrs.
Trade-1	Fitting : Use and setting of fitting tools for chipping, cutting, filing, marking, center punching, drilling, tapping. Term work to include one job involving following operations : filing to size, one simple male-female joint, drilling and tapping.	L01	14
Trade-2	Carpentry : Use and setting of hand tools like hacksaws, jack planes, chisels and gauges for construction of various joints. Term work to include one carpentry job involving a joint.	L02	14
Trade-3	Basic Electrical workshop: House Wiring Electrical safety in the workplace. Protective equipment and tools. Different types of cables, electrical wiring diagrams, types of circuits, types of switches. Different wiring methods: Godown wiring, Staircase wiring, House wiring, Extension board. PCB Design, Layout drawing, Positive and negative film making, PCB etching and drilling, Tinning and soldering technique, component mounting and circuit testing.	L03	12
Trade-4	Hardware and Networking : Dismantling of a Personal Computer (PC), Identification of Components of a PC such as power supply, motherboard (Chipset), processor, hard disk, memory (RAM, ROM), CMOS battery, CD drive, monitor, keyboard, mouse, printer, scanner, Pen drives disk drives etc. Assembling a Personal Computer. Installation of Operating System (any one), Boot-up sequence and Device drivers. Installation of application software's, Basic Troubleshooting and Maintenance. Identification of network components LAN card, wireless card, switch, hub, router, different types of network cables (straight cables, crossover cables and rollover cables), Basic networking (LAN, WAN, configure IP address etc) and crimping.	L04	12
	Total Engagement Hours		52

Social Responsibility, Community Engagement and Student Well-Being

As part of the **First Year curriculum**, students are allotted **25 marks in each semester** for participation in structured social responsibility and community engagement activities. The initiative is designed to extend learning beyond the classroom and encourage students to become responsible, empathetic and socially conscious citizens.

Students participate in a diverse range of activities, including **cleanliness drives on college premises, awareness rallies, tree plantation drives, beach-cleaning campaigns, environmental awareness initiatives, cultural programmes, community outreach activities and other socially relevant projects**. These activities provide students with opportunities to work collaboratively, engage with the community and contribute meaningfully to society.

The programme also incorporates **student well-being and personal development activities**, including courses and workshops on **Yoga, stress management, emotional well-being, mindfulness, self-awareness and healthy lifestyle practices**. Such activities enable students to develop effective coping strategies, emotional balance, self-discipline and a positive approach towards academic and personal challenges.

VIVEKANAND EDUCATION SOCIETY'S Institute of Technology

(An Autonomous Institute Affiliated to University of Mumbai, Approved by A.I.C.T.E & Recognized by Govt. of Maharashtra)

First year Bachelor of Technology

Through this integrated approach, the initiative promotes **social responsibility, civic engagement, environmental consciousness, teamwork, empathy, self-awareness and holistic well-being**. It supports the institution's commitment to developing well-rounded graduates who are not only technically competent but also socially responsible, emotionally resilient and actively engaged with their community.

Assessment Rubrics:

Sessions from eminent persons on important themes like cyber bullying, cancer awareness, organ donation etc.
