Detailed Report

An engineer needs to be observant on how basic science makes a difference in our day to day life. Awakening the Scientist is such a platform provided to the First year students to express their innovative ideas. It is organised by H&AS department in association with VESIT IIC and IQAC.

To make students aware of this opportunity, an awareness drive was carried out by students. They visited classrooms and personally interacted with their peers, explaining the competition details using relatable examples. These peer-led sessions highlighted the importance of idea pitching and the practical application

of innovations in basic science. Students also spoke about how technology has evolved over time and emphasized the need for strong technical knowledge in today's competitive world. The informal discussions also encouraged teamwork and fostered a spirit of collaboration and shared learning among the participants.

First year students make groups, and each group identifies the basic engineering and technology used in the gadget and tools used in everyday life. This year , 14 groups with a total number of 56 students had registered for the event.
